Objective

To expand my skill set as a MERN stack developer by acquiring proficiency in additional technologies and frameworks, enhancing my ability to develop robust, scalable, and efficient web applications.

Education

- **Punjab University** 2023 - 2027
BSCS
Continue
- **Govt shah Hussain degree college** 2023
ICS
837
- **Afaq public high school** 2021
Matic
1010

Skills

- MERN Stack
- Python
- Java
- NEXT Js
- My sql
- React js

Projects

- **E commerce**
I have created a e commerce website in next js with admin dashboard.
- **Chat application**
I created a chat application with authorization. I use node js for backend and react js for frontend. In this website, user can use one-to-one chat and also group chat. In group chat only admin can add and remove members.
- **Ai website**
In this website, i used gemini api which accepts the user input and generates response according to that input. I use next js technology for this project
- **Amazon scrapper**
I created a react app in which user can scrap amazon products and otto functionality. And i display that data into the tables.
